Introducing
ZipSurvey
for Non-Profit Organizations

One of the principle challenges facing non-profit organizations with whom we have consulted is their frequent need to collect feedback from stakeholders (e.g. membership) using a method that is inexpensive.

Did you know?

Research has consistently proven the Internet to be the most cost effective, secure, and reliable method for conducting survey research. In response to this need, CorporateSurvey.com has worked to develop this simple tool that consultants can use to develop and administer effective Internet-based survey research. This tool is ZipSurvey.

ZipSurvey *Continued...*

ZipSurvey can be used to develop and administer Internet-based surveys that *quickly* and *inexpensively* collect feedback from your organization's members:

“Collecting **meaningful and accurate** information has never been easier!”

DEVELOP SURVEYS

Design tailored surveys with an intuitive survey editor that is as easy as point-and-click. Select from a variety of question and response formats (single choice, multiple choice, rating scales, drop-down menus, etc.). Powerful options allow you to require answers to any question, and utilize multiple question types within a single survey application. The user also has control over the aesthetic layout of the survey. In addition, a comprehensive, online help guide is available to help you develop quality surveys and address survey design issues, administration techniques, sampling considerations, etc.

ADMINISTER SURVEYS

The confidentiality and objectivity of all survey data is ensured because CorporateSurvey.com hosts and administers the surveys on our own secured servers. We have invested heavily in a world-class technological infrastructure so you don't have to. Check out the details of Our Technology below.

You have the ability to send automated email notifications to survey participants through ZipSurvey. Collecting meaningful and accurate information has never been easier!

REPORTING

View survey results as they are collected in real-time. Generating item frequency graphs is easy, and filtering tools allow users to dig down to examine results by demographic characteristics, etc.

Securely share survey results with others. Powerful filtering allows you to display only the responses you are interested in. The data file may also be easily downloaded and imported into other programs such as Excel or SPSS for more complex statistical analyses.

Why Zip Survey?

• ZipSurvey was developed by experts in survey research methodology. We have included ZipSurvey Tips for Developing Effective Surveys within our product. This help guide was developed by our Ph.D.'s and is full of useful information. Our staff of Ph.D.'s are continuing to work on new developmental and reporting features that will be added to ZipSurvey at no additional cost to you.

Furthermore, our consultants are available to work with you one-on-one to design content anytime you need advice.

Our Technology:

Speed, Capacity, Reliability

- PowerEdge 2650, Dual Intel® Xeon™ 2.4GHz Servers
- 2.0GB DDR RAM per Server
- 3 - 73GB, 10K RPM, Ultra 160 SCSI Hot Plug Hard Drive RAID 5 configuration per Server
- Redundant AC Power (2x500 Watt Power Supplies)
- Microsoft Windows 2000 Advanced Server
- Microsoft SQL Server 2000
- 40 GB Tape Backup (DLT Drive)

Best-of-Breed Systems

- Multi-layered security backed by biometric palm scans, digital surveillance, and 24x7x365 on premise security
- Redundant fiber connections scaleable to OC-192s
- Cisco routers
- Redundant Liebert Chilled water HVAC equipment
- Redundant power systems with back-up generators and UPS systems
